

**Process safety certificate pilot**

Health, safety and environmental training specialist RRC International has been chosen by NEBOSH to help it pilot the NEBOSH HSE Certificate in Process Safety Management.

This new qualification is designed specifically for those with safety responsibilities in the process industries and aims to provide candidates with the knowledge and understanding they need to contribute effectively to managing process safety risks. The qualification has been developed through a collaboration between NEBOSH and the Health and Safety Executive (HSE).

This course is suitable for those who work in process industries all over the world, such as oil and gas, chemicals, plastics and pharmaceuticals. Given the hazardous nature of these industries, this qualification has been designed to give managers, supervisors and safety professionals working in them the specialist knowledge and understanding they need to keep their staff, sites and surroundings safe. RRC is running pilot courses in both their London and Dubai training centres.

**Slip resistant footwear**

Because the workplace floor cannot always be relied on to be non-slip and may be contaminated with water, oil, grease, food or other residues, anti-slip safety shoes are essential in many industries such as construction, food manufacturing, offshore oil and gas and utilities.

Wearers of any of RedLion's 40 different, sporty, high-performance models, which are all classified SRC, meaning they have more than met the specified requirements when tested on both wet ceramic tiles and steel with glycerol, can be confident of their safety.

To have maximum slip-resistance, safety footwear should fit properly, be extremely comfortable, and have a flexible sole with an effective tread pattern that grips the floor, no matter what the conditions. The RedLion is designed to fulfil all these criteria with ease.

The RedLion has a coefficient of friction (CoF) of 0.82, double the industry standard, demonstrating its impressive resistance to slip accidents.

**Safety first! We care about you and your safety. From safety sensors for machinery to safety vests for children.**

Panasonic, one of the leading manufacturers of safety engineering technology, takes a proactive approach to keep children safe on the road.

**Panasonic cares about children's safety**

Unfortunately, children are involved in many road accidents – they are easy to overlook in busy road traffic. This is why we would like to give your child a safety vest so that they can walk to kindergarten or school more safely. But there's more: We'll throw in 20 safety vests for the class or kindergarten group of your child. Simply fill in the order form and we will send you the safety vests at the end of the campaign.
