

Cority ranked top 5 worldwide

Environmental, health, safety, and quality software provider Cority has been placed in the top five EHS software brands by independent research firm Verdantix.

The 2018 Global EHS Leaders Survey: EHS Software Brands looks at the responses of 411 senior EHS decision-makers across 35 countries and 25 industries to understand software brand preference and awareness in firms with high to very high EHS risk profiles. Brand preference is defined as respondents perceiving an EHS software vendor as having market-leading or strong capabilities.

Specsavers solves the problem

Research from Specsavers Corporate Eyecare has revealed that the majority of staff who wear prescription glasses are still being provided with safety over-goggles.

Just under half of respondents said they have staff who need safety eyewear as part of their working role, yet 55% are provided with safety over-goggles; 28% are provided with prescription safety eyewear sourced by the company; and 18% let their staff source their own prescription safety eyewear.

Prescription safety glasses are a more suitable solution for anyone requiring safety eyewear on a regular basis.

RRC's new courses for 2019

RRC is introducing two new NEBOSH courses to its Dubai classroom schedule this year, along with expanding the courses offered in the UK.

Launched in London in mid 2018, RRC's NEBOSH

HSE Certificate in H&S Leadership Excellence course has proven exceptionally popular and for 2019 further courses will run in Birmingham, Glasgow, Manchester and Newcastle. RRC is also introducing the course to its Dubai centre with the first course in February, and a further four dates scheduled throughout the year. Following the growing interest in environmental training in the Middle East region RRC is also introducing the NEBOSH International Environmental Diploma to its Dubai centre, with the first course starting in Autumn 2019.

Dyer & Butler wins CECA award

Dyer & Butler, a multi-disciplined engineering services specialist has been presented with the Civil Engineering Contractors Association (CECA) Southern Award for Safety Initiative and Innovation. The award was presented to Dyer & Butler IT technician Alex Wiggins for his work in developing Dyer & Butler's 'close call' reporting system. Since its introduction in 2015, the system has been used to raise more than 6,000 close call – not only by employees, but by Dyer & Butler's supply chain partners, clients and members of the public.

Spanset acquires stake in CoreRFID

SpanSet – the Swiss multinational which produces lifting and height safety products – has acquired a stake in Skelmersdale-based software firm CoreRFID. The deal will make CoreRFID the leading supplier of lifting inspection

software systems worldwide.

CoreRFID's CheckedOK solution helps companies to comply with the rules on safety and maintenance inspections. Radio frequency identification (RFID) tags are used to identify cranes, forklifts and other equipment in need of regular inspections while the software helps to ensure these are carried out and keeps track of the results.

The system is a market leader in the UK and Ireland and was adopted by SpanSet several years ago and incorporated into its product range.

Pall-Ex is miles ahead of industry

Pall-Ex has underlined its commitment to promoting health and safety in the logistics industry after becoming the first pallet network to achieve another gold standard – the latest ISO accreditation.

The haulage giant has achieved accreditation for the ISO 45001:2018 in Occupational health and safety management. This new International standard gives organisations a framework to improve employee safety, reduce workplace risks and create better, safer working conditions.

An audit for the accreditation highlighted the benefits of a £250,000 forklift truck investment, which has seen its fleet clock up 559,502 miles in a year – the equivalent of driving to the moon and back. The fleet has improved efficiency and safety at its Coalville hub, which handles thousands of pallets daily thanks to features including blue light safety technology, a telematics system and seatbelt lockout.
